

HAMSA PRIYA M

Bengaluru, Karnataka — +91 6361542923 — hamsapriyamanasali@gmail.com
LinkedIn — GitHub — Portfolio

Objective

Motivated Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning, with strong skills in software development, AI applications, and problem solving. Seeking opportunities in Software Engineering, Full Stack Development, Artificial Intelligence, and Machine Learning to apply technical knowledge and contribute to innovative projects.

Education

Sapthagiri NPS University, Bengaluru	2024 – 2028
B.E. Computer Science Engineering	CGPA: 8.84
Artificial Intelligence and Machine Learning	
TMAE PU College	2024
Class XII (Karnataka State Board)	87.16%

Technical Skills

- **Programming Languages:** Python, Java, JavaScript
- **Web Development:** HTML, CSS, JavaScript, React, TypeScript, Node.js, Express.js, MERN Stack, Tailwind CSS
- **Databases & Tools:** MongoDB, SQLite, Supabase, Prisma, Git, GitHub, VS Code, Vercel
- **Core Concepts:** Data Structures & Algorithms, OOP, Computer Networks, Operating Systems
- **AI Technologies:** Google Gemini AI, Groq AI, Twilio APIs, REST API Design, JWT Authentication

Experience

- | | |
|--|----------------------|
| Software and AI Intern | May 2026 – June 2026 |
| <ul style="list-style-type: none">• Spearheaded error detection and debugging initiatives to resolve application faults in the agent workspace.• Engineered performance optimizations that minimized latency and improved live agent response time.• Upgraded transcription pipelines to improve transcript quality and availability for post-call processing. | |

Projects

- | | |
|---|-------------------|
| Hospital Intelligence — AI-Powered Clinical Workflow Platform | Repository Live |
| <i>React, TypeScript, Node.js, Express.js, Prisma, SQLite, Tailwind CSS, Google Gemini AI</i> | |
| <ul style="list-style-type: none">• Developed a full-stack, role-based healthcare portal for patients, doctors, and hospital administrators to streamline clinical workflows and patient data management.• Integrated Google Gemini AI to automatically generate structured clinical shift handovers, analyze safety incident root causes, and translate complex medical consent forms into plain English.• Designed scalable REST APIs using Node.js, Express.js, and Prisma with strict JWT authentication, and built a highly responsive React dashboard styled with Tailwind CSS. | |
| Dhwani AI — AI-Powered Patient Engagement System | Repository |
| <i>HTML, CSS, JavaScript, Node.js, Express.js, Supabase, Twilio, Groq AI</i> | |
| <ul style="list-style-type: none">• Developed an AI-powered healthcare platform for automated medicine reminders and multilingual patient interaction.• Integrated Twilio voice APIs and AI-based response analysis for real-time healthcare communication.• Designed scalable backend systems for patient data management and intelligent response processing. | |
| ThailaVardhana — Oil Palm Farmer Support Platform | |
| <i>React, Node.js, MongoDB, Tailwind CSS</i> | |
| <ul style="list-style-type: none">• Built a smart platform supporting crop advisory, financial planning, and income tracking.• Developed responsive frontend interfaces and backend services for farmer support management.• Improved sustainable farming awareness and rural digital accessibility. | |

SeedIntel — Crop Shift Mitigation App

HTML, CSS, JavaScript

- Developed a decision-support platform using weather, water, and market data.
- Guided farmers in selecting profitable and sustainable crops.

Hackathons & Competitions

HackMatrix 2.0 — 2nd Place Winner

IIT Patna — 36 Hour Hackathon

Dhwani AI — AI-Powered Patient Engagement System

- Secured 2nd position at HackMatrix 2.0 conducted at IIT Patna with JioHealth and NJACK.
- Participated in a 36-hour hackathon focused on AI healthcare solutions.

Smart India Hackathon (SIH) — Grand Finalist

36 Hour National Hackathon

ThailaVardhana — Oil Palm Farmer Support Platform

- Secured Top 3 position for developing a digital platform supporting oil palm farmers.
- Solved real-world agricultural challenges in a 36-hour hackathon.

The Big Hack — 24 Hour Hackathon

Acharya Institute of Technology

Cyber Lens — AI-Based UFDR Report Analysis Tool

- Developed an AI-based forensic report analysis system.
- Contributed to the development of an AI-powered forensic report analysis system for investigation workflows.
